

Taking care takes time ❤️ We're taking extra precautions to keep you and our crew safe! You'll notice that things look a lil' different around here...

We're keeping the dining rooms closed to seating, for now. But you'll get to see our super cute new donut setup!! When you arrive at one of our locations, we'll have markers along the sidewalk and inside the shop to help everyone keep their distance while waiting for pick up. Dance moves and distant high fives are highly encouraged. :) For now, we are limiting shops to a maximum of three people inside at a time. In addition to being provided with masks, gloves, sanitizer, and safety training, all staff conduct temperature and wellness checks at the start of and throughout each shift, and detailed sanitation and cleaning checklists are conducted every 2 hours. We've installed medical-grade HEPA air filters in our HVAC systems, and have an extra purifier at the check-out. We also now offer contactless pre-orders, curbside pick-up, and third-party delivery for the safety and comfort of our customers. Our Production, Wholesale, and eCommerce departments strictly adhere to the above protocols, and work in staggered shifts to keep as much distance as possible when working.

We appreciate your patience and kindness as we all take extra good care of each other! Please follow us on Instagram or Facebook for updates, as well as some delicious new flavors we're cooking up!
